About Us

We are a group of concerned citizens who care about the future quality of life in Rhode Island.

Our greatest asset is our connection to Narragansett Bay and the ocean which provide a unique quality of life. Offshore wind power is a currently threatening our pocketbooks.

We intend to provide education to our state's electric ratepayers and voters about the unaffordable high cost and damage potential of large off-shore wind turbines off our coast.

Funds will be used to provide, written materials, public awareness campaigns, and local advertising.
